PROFESSIONAL SUMMARY

Senior Product Designer with 9+ years of experience delivering 70+ B2B, B2C, C2B, and C2C products across e-commerce and enterprise ecosystems. Combines end-to-end product design with team leadership and **advanced AI workflows**. Proven track record of cutting design production cycles through custom AI tooling, streamlining **complex enterprise systems, and driving data-backed product decisions**.

CORE COMPETENCIES

- **Product & Systems Design:** Enterprise & E-commerce Workflows, Web & Mobile UX/UI, Prototyping, Design Systems, UX Writing.
- **AI Tooling & Innovation:** AI Feature Integration, Internal AI Tool Development, AI-Driven Design Operations.
- **Research & Analytics:** Quantitative/Qualitative User Research, Usability Testing, Funnel & Behavioral Analysis (Go-Practice Certified).
- **Leadership & Ops:** Team Mentorship (5 Designers, 3 Interns), Cross-Functional Alignment, Agile Design Planning.

WORK EXPERIENCE

Senior Product Designer

Kazakhstan, Full-time, On-site, March 2024 – Present

***Kaspi.kz** is Kazakhstan's #1 Super App, serving more than 16 million monthly active users. In 2020, the company went public on the London Stock Exchange and AIX, followed by a Nasdaq listing in 2024. A success story now examined at Harvard Business School.*

- **High-Scale Ecosystems:** Spearhead end-to-end design for Kaspi Store, Seller Portal, internal chat tools, and logistics applications, serving millions of end consumers, merchants, and operations staff.
- **AI Tooling & Efficiency:** Co-created an internal AI design tool that accelerated team production cycles; trained and integrated advanced AI workflows across the entire design department.
- **AI Feature Integration:** Designed and shipped native AI-powered capabilities within Kaspi Store products to simplify discovery and seller workflows.
- **Product Quality & Validation:** Utilize usability testing and product analytics to validate feature rollouts, refine UX copy, and enforce design system continuity across web and mobile.

Product Designer | Design Team Lead

Kazakhstan, Full-time, On-site, July 2022 – February 2024

***Adata.kz** is a business platform with a broad toolkit that aggregates information from official registries and government systems. It lets you vet counterparties, analyze procurement, foreign trade activity, and penalties, and carry out compliance monitoring.*

- **Website Redesign & Engagement:** Spearheaded the total website redesign, boosting average session duration from 2:16 to 8:19 (+266%) and increasing average page depth from 1.42 to 2.41.
- **Design Systems & Scalability:** Architected and scaled the company's unified Design System, accelerating overall design delivery speed 5x across parallel product streams.
- **Enterprise Compliance Platform:** Led end-to-end UX/UI for Samruk-Kazyna's compliance platform and engineered a multi-tenant version that directly drove high-value enterprise sales with major commercial banks.
- **New Product Development:** Designed the core user flows, interaction models, and end-to-end UX/UI concept for a brand-new tender platform.
- **Team Leadership & Operations:** Managed a team of 5 designers and 3 university interns; drove resource allocation, regular 1-on-1 mentorship, and sprint planning alongside PMs and engineering leads.

Product Designer

Kazakhstan, Full-time, On-site, January 2019 – July 2022

***APPLECityCorps** is the largest distributor of fast-moving consumer goods (FMCG) and provider of logistics services (3PL) in Central Asia. It is the distributor of products from P&G, JDE (Jacobs), Mondelez (Alpen Gold, Oreo), PepsiCo, and Nestlé in Kazakhstan*

- **Workflow Optimization:** Reduced customer service response time by 20% by restructuring user scenarios and optimizing the enterprise invoice export engine.
- **User Research:** Designed enterprise web and mobile solutions validated through direct user interviews, task analysis, and iterative prototype testing.

UX/UI Designer

Kazakhstan, Full-time, On-site, June 2017 – January 2019

THOUSAND IT GROUP an IT studio specializing in the development of websites, CRM systems, and mobile applications for iOS and Android. Delivered products that achieved over 15 million downloads globally.

- **Design System Architecture:** Built a scalable e-commerce design system from scratch, establishing reusable component libraries, style guides, and interaction patterns.
- **End-to-End Product Delivery:** Translated customer journey mapping and persona research into polished interactive prototypes for web and mobile products.

INDEPENDENT INITIATIVES

Currency Converter – code name

Coming soon

A completely free app with zero ads and no hidden subscriptions. Designed for travelers and anyone who needs to track currency changes on the go. The core principle of this app is absolute transparency for the user.”

EDUCATION & CERTIFICATION

Data-driven Product Management Simulator at GoPractice, Inc.

Issued - June 2025 - [Credential ID xhx9ggfs](#)

Completed intensive hands-on training in product management and product analytics through an immersive IT company simulator. Logged over 100 hours of real-world practice in metric calculation (Retention, ROI, unit economics), running A/B tests, and making data-driven product decisions. Completed 416 practical assignments, gained deep experience in analytical work using Amplitude, and achieved a final score of 92%.

B.A. in Foreign Languages Suleyman Demirel University

Kazakhstan, 2017–2021

Trained as a Foreign Language Teacher with a professional certification as a Translator.

SKILLS

Tools: Figma, Sketch, AI Design Tools, Gemini, Claude Code, Codex, ChatGPT, Adobe Illustrator, Presentation, Power-Point, Google Docs, Slack, Jira, Confluence, UI Library Frameworks.

Methods & Strategy: Workshop Facilitation, Stakeholder Management, Product Strategy, Accessibility (a11y), A/B Testing, Animation Concepts, Implementation Reviews, AI Image Generation and Prompts Writing, AI Skill Creation, Design Engineering, MCP-based workflows.
